W. MITCHELL INNIS, of Olds, and formerly of Colfax county, Nebraska, came in on Thursday's train. Mr. Mitchell Innis visited Edmonton in July of last year in company with the first Nebraska delegates conducted by H. H. Smith. THE Belleville Intelligencer says: "J. A. Clarke left this morning for the Northwest where he will make his future home. Mr. Clarke was for years famous as a cricketer and he has filled several prominent positions in the Orange order. His departure from his native city will be regretted by his many friends." Mr. Clarke arrived on Monday's train and proposes to locate at Edmonton.

As is generally known the arrangement between the members of the Parry Sound colony of last year and the C. P. R. was of such a nature that the C. P. R. took security on the property of the colonists for the amount of their fares and freight charges, allowing them three years in which to make the payments. Although only a little over one year has elapsed these moneys are already being repaid in full. John J. Bell of South Edmonton being the first member of the colony to square up with the company.

THE Toronto Ideal concert company will arrive on to-night's train on their return from a tour through the Territories and British Columbia to the coast. Their concerts have been well received wherever they have appeared. Three members of the company are most favorably known to Edmonton people. The fourth member, Mr. Fred Warrington of Toronto has a provincial reputation as a singer. People who like good music should not fail to attend the concerts on Tuesday, Wednesday and Thursday evenings next. The value of a good musicial entertainment is not confined to the pleasure received at the time; its chief value to the majority of people is in its educative effect.

Moore, homesteaded at Olds: Chris Beck will locate at Regina; Messrs. Shannon, Fatherlos, Stiles, Stillwell and Fix left on Saturday for Beaver lake and Dried Meat lake on Battle river, and will take the train again at Wetaskiwin. Several of them drove to Wetaskiwin on Saturday intending to take up land in that vicinity.

FRANK MCPHILLIPS D. L. S. was in town to-day from his survey contract west of Leduc. The weather has been very rainy there and the country is very wet. His party will remove shortly to Dusty lake south east of Beaver lake. His contract of several townships at the southern end of the Beaver Hills, will not be done this season on account of its being so wet.

SEFERAL members of the Colfax, Nebraska, colony at Olds, brought bees with them this spring. O. S. Moore informed the BULLETIN that one of the parties owning the bees weighed one of the hives in the morning and the evening of the same day and the hive weighed five pounds more in the evening than in the morning, the natural inference being that the bees gathered five pounds of honey into the hive in one day.

FRASER & Co's. steamer was launched successfully on Saturday evening, after a difficult and tedious trip from the railway station to the river, which included of course a descent of nearly 300 feet from the level of the station to the river. Heavy frames had been made in which the boat rested, and these were raised from the ground and swung from wagons when passing over level ground. The descent of the hill was made on runners instead of wheels. She was launched at the upper ferry landing and steamed down to the mill landing where she was tied up over Sunday. She was shipped from Kingston, Ontario, fitted ready to be put in the water and have steam started at once.

J. J. MCINTYRE of J. A. McDougall's store returned from Regina and Winnipeg on Thursday's train. He spent three days at the Winnipeg exhibition. The crowds were tremendous. The exhibits of cattle and horses were particularly fine. The Territories did not seem to be strongly represented in exhibits. The hotels were full and business seemed brisk in the city. Crops are fairly good all along the railway from Winnipeg west. In some places they do not seem to have had enough of rain. At Regina there has been abundance of rain and crops are good, but nowhere are crops as luxuriant as at Edmonton. There is a large amount of very substantial building in progress at Regina. C. Howson is building a $30,000 hotel, on the site of the burned Windsor, which will be completed in September. A fine new court house is also being built by the Dominion Government.

A By-Law to provide for borrowing the sum of $15,000 upon the credit of the Municipality.

Whereas it is expedient that there should be raised by the Municipality of the town of Edmonton the sum of $15,000 to enable the Municipality to erect a fire hall, to purchase certain fire apparatus required for the use of the Municipality and provide means for a suitable supply of water for purposes of fire protection.

And whereas it is expedient to borrow the said sum of $15,000 by the issue of debentures, the principal whereof shall be repayable in 20 years from the date on which this By-law takes effect and which shall bear interest in the meantime payable half yearly at the rate of five per cent per annum.

And whereas it is expedient to provide for the repayment of the said principal sum by the creation of an equal yearly sinking fund.

And whereas the total amount which will be required to be raised annually by a special rate for repaying the said debt of $15,000 by means of a sinking fund as aforesaid, and the interest thereon as aforesaid is $1,203 65.

W. T., and to have attached to them coupons for the payment of interest.

(3) For the purpose of paying the amount which shall be required to be raised annually for paying the said interest and creating an equal yearly sinking fund to be set apart for the said principal sum of $15,000, a special rate of one mill and eighty-two one hundredths of a mill on the dollar over and above all other rates and taxes shall be levied (in the same manner and at the same time as the general municipal taxes) upon the whole rateable property in the Municipality in each year for the period of 20 years from the said 2nd day of July, 1893, being the period during which the said debentures will run.

(4) Wednesday the 10th day of May, 1893, between the hours of 9 o'clock in the forenoon and five o'clock in the afternoon at the office of the town clerk, Edmonton, is hereby fixed as the day and hour and place for taking the votes of the electors for and against this proposed bylaw.

EDMONTON BULLETIN JULY 31ST, 1893

TAXATION.

The question of taxation is being argued very strongly on all sides at the present time, and in the course of argument comparisons are frequently made between the burden of taxation carried in Canada and the United States respectively. As both countries have protective tariffs it would naturally be supposed that there would not be much difference. On the whole the tariff of Canada is apparently somewhat lower than that of the United States, but whether it is really lower or not is a point that is very difficult of settlement. For the burden of the tax is not measured so much by the percentage of duty or by the total amount of duty required to be paid, or by the gross amount paid in higher prices on account of the protection afforded by the tariff. But there is another side to the question besides that of the payment of taxes and that is the purposes for which those taxes are expended. In the United States as in Canada the amounts derived from customs tax and internal revenue tax go entirely to the federal treasury but in Canada, different from the States, a large proportion of the whole tax so derived, is handed over to the provinces to be used for provincial purposes. In the States a direct tax is levied for the support of the state government while no such tax is levied in Canada, so that supposing the Canadian tariff to be equally burdensome with that of the United States, Canada has the advantage at least by the amount of the state tax. This principle is carried through all departments of the government of both countries. In the States the schools are supported by direct tax, the municipalities the same, and the states the same, while in Canada the taxes paid to the general revenue are partly returned to the people by lightening the necessary burdens of provincial and municipal government and aiding in the support of schools. In speaking with two of the delegates who arrived from Nebraska and Dakota respectively last week the BULLETIN found that in those states the direct taxes of the school districts are the sole support of the schools except a small sum received from a fund provided from the sale of school lands. The consequence is that the people on the farms pay high school taxes and only have the schools open from three to six months in the year. Contrasting with this is the system in the Northwest where the local government pays from funds derived from the federal government, which again are derived from the customs taxes, 70 per cent of teachers salary, the rate of direct taxation is low and schools are kept open in all districts for at least six months in each year. It is in municipal taxes however, in which the States shine. In the territories the local government which stands in the same position as the state government assumes as far as possible the duty of road improvement. There the burden falls solely on the county. But the road improvements actually made are a small part of the burden. Owing to the vicious municipal system in vogue there whereby men are elected to offices of profit by popular vote, the offices are made sufficiently profitable to bear the expenses of an electoral campaign. A county treasurer draws from $2,000 to $3,000 a year. In most counties he is allowed a deputy for whom the county pays at the rate of $1,000 to $1,500. There is a clerk, a registrar, a county attorney and sheriff all drawing round salaries and collecting fees as well. There is generally a bonded debt to be provided for on account of county buildings, half the cost of which was frequently boodled. So that while taxes are high, and fees are heavy there is little or nothing for road improvement. In Minor county South Dakota the taxes are from $180 to $300 on a quarter section of land, and on personal property a delegate informed the BULLETIN that he had paid $11 on an assessed value of $600. In Nebraska the country is older and taxes are lower. In the county spoken of to the BULLETIN the tax on a quarter section was $14, and on personal property about the same as in Dakota. These figures are not given to show that the Canadian tariff is as low as it should be by any means, but merely to show that our tariff might be much higher than that of the United States without the total burdens of the people being any greater than there—owing to the difference in the purposes to which the money is applied after it reaches the federal treasurery; in our case lightening the burden of direct taxation which in the states is borne without any relief.

Since being imported he won the second prize at the Dominion exhibition held at Ottawa in September, 1884, also first prize at the Clarke Agricultural show, and the first at the Darlington Agricultural show in 1885 and second in 1886. Petroleum! PETROLEUM
For some months past it has been know that an important discovery of indications of Petroleum, had been made at Egg Lake, about 18 miles northwest of
Fort Saskatchewan
Some believed it and others did not. However, Mr. J. B. Tyrrell, of the Dominion Government Geological Survey, has visited the Lake, and satisfied himself that there are ample indications to warrant development operations being begun. (Vide, Edmonton "BULLETIN," of 1st Instant.) This being so—what do the Dominion and Territorial Governments, and also the Canadian Pacific Railway, propose doing about it? And when? All three are equally interested. It is the duty of every person in Northern Alberta to make the most of such an important discovery of mineral wealth in our district, and to keep things agitated until something is done to develop—or are we all dead to the advantages to be gained?

FORT VERMILLION.

On Peace river is a point of considerable interest as being the most northerly point in Canada where agriculture is carried on as a private means of livelihood and speculation. It is in latitude 58½, about 150 miles further north than Shaftsbury mission, Peace river, where agriculture is also successfully carried on and 300 further north than Edmonton. Bishop Young, of the Church of England diocese of Athabasca, who has had his residence at Vermillion for the past seven years—although not always residing there—gives the following information regarding the place. The H. B. fort or trading post is the principal H. B. establishment on Peace river between Chipewyan and Dunvegan a distance of about 400 miles. It is near the chutes or falls, the only break in the navigation of Peace river from the Rocky Mountain Portage to the rapids on Great Slave river. It is at the terminus of an interior canoe route from the south which connects the Athabasca above the Grand rapids with the Peace, and is the point at which a pack trail leaves Peace river northward for Hay river which empties into the eastern end of Great Slave lake. It is thus a convenient meeting place for Indians, and consequently an eligible site for missionary work as well as trade. Many years ago the Church of England established a boarding school for Indian children there, under the management of E. J. Lawrence of the Eastern Townships of Quebec, and the Roman Catholic church also established a mission. When the Church of England diocese of Athabasca was separated from that of Mackenzie river, Bishop Young of Athabasca fixed upon Vermillion as the most convenient centre from which to oversee the work of his diocese, so that what has been done there has been under his own eyes. At an early period in the history of the mission school the food question become of extreme importance, and Mr. Lawrence determined to attempt the solution of the question by testing the agricultural capabilities of the place. He planted barley, potatoes and other vegetables with gratifying results, and sometimes wheat as well. After the experience of several years had proven that agriculture in the branches named was a success and after it had also been shown that horses and cattle could be raised with advantage, in 1886, Mr. Lawrence imported a Waterous steam engine and grist mill to convert the barley into flour, the saw mill to provide lumber for building and the engine to provide power. This machinery was hauled from Calgary to Athabasca Landing 300 miles by oxen. From Athabasca Landing to the head of Lesser Slave lake 200 miles it was taken in the row boats of the Hudson's Bay Company. From the head of Lesser Slave lake to Peace river 90 miles it was hauled by the same oxen which had hauled it from Calgary and which had been driven over land by a route that had never before been travelled. At Peace river large rafts were made and machinery, oxen, horses and pigs, of which several were brought, were loaded on rafts and taken down Peace river to Vermillion 200 miles. In this enterprise Mr. Lawrence was assisted by his brother Henry Lawrence and a relative named Knedland. Since then the mill has done good service. By grinding barley into flour and by providing lumber it has made possible the establishment of a small settlement, chiefly of half breeds, who depend upon their fields for food; whose numbers are increasing every year and whose faith in the productiveness of the country is shown by their increase in cultivation. The names of the settlers are: Wm. Smith and two sons; W. Flett and family; J. Flett and family; J. Lambert and family; Robert Jones and family; E. J. Lawrence and family; Henry Lawrence and family; three Lizots, a father and two sons, Cardinal and family; King Beaulieu and family. These people have all been successful with barley and potatoes, and last year the Roman Catholic mission and Wm. Smith had good wheat. The Messrs. Lawrence are not now connected with the church or mission work and are simply farming for profit as farmers do in other countries. They grow barley and potatoes, make butter and cheese and raise cattle, horses and hogs. Last fall E. J. Lawrence killed 75 hogs. The brothers are on separate ranches, one below and the other above the fort. They have about 100 head of cattle between them, and cultivate quite a large area of land. The soil in the neighborhood of Vermillion and for a long distance in every direction is deep and black without stone, the country is chiefly wooded, but has many fine prairie openings, the vegetation is very luxuriant. The banks of the river are low and slope gently back, not rising abruptly like the banks of the Upper Peace. Above the fort they become higher and below they become lower. On Paddle river, a tributary of the Peace, is said to be some fine open country. The fort and chief part of the settlement is on the south side of the Peace. The winters are not so severe as to prevent horses from wintering out. Indeed there seems to be no reason why there should not be a large and flourishing agricultural settlement at Vermillion some day. The past winter was more severe than usual. The spring was favorable, there being abundant rains in May. F. D. Wilson, formerly of Edmonton, is in charge of the H. B. post at Vermillion.

The local newspaper represents the district in which it is published to the outside world.

Support your home paper liberally if it deserves support, so that it can give the best possible impression of your town and district as a field for immigration and investment.

CRICKET MATCH.

The most interesting cricket match of the season was held on the Edmonton race grounds on Saturday last. It was the third game between the Edmonton and Fort Saskatchewan clubs and both sides were out to do their best. The day was fine and every provision had been made for the accommodation and comfort of spectators. A large marquee tent had been pitched, in which lunch was served at 1 p. m. A tent was provided for the scorers. The fire brigade band was in attendance, adding greatly to the pleasures of the day. Wickets were pitched at 11 a. m. and were pulled at 6:30. The result was 55 and 75 for Fort Saskatchewan against 86 and 46 for Edmonton with six wickets to spare. Dr. Wilson was captain of the Edmonton team and Constable Campbell of that of Fort Saskatchewan. There was a large attendance of spectators and much interest was manifested. The return matting of the Fort Saskatchewan club was used. Full score next issue.

GENERAL NEWS.

Wilfrid Campbell, the poet of the lakes, has been given a permanent position in the militia department.

In the boat race at Orillia on July 22th Hanlan was defeated by Gaudaur by seven lengths.

Track laying on the north end of the "Soo" extension will be actively commenced in a few days. At the southern end of the Canadian section of the road rails are being laid at the rate of two miles per day.

Battleford Herald: Strawberries are plentiful and raspberries will soon take their place, and the crop will be a good one. Saskatoon berries are also ripening fast, but of these the yield will be below the average.

Calgary Herald: A party of delegates from Washington, who have been through Northern Alberta seeking locations, returned last night on their way to Washington to close out their affairs in that country before settling. A part of the party have bought lands near Egg lake while the rest settle near Wetaskiwin.

Free Press: Mr. C. O. Swanson, the well known agent, of Waterville, Quebec arrived yesterday accompanied by fourteen delegates and twenty settlers from the States. He will leave on Wednesday morning to locate his settlers at Wetaskiwin; and after the delegates have inspected that vicinity, he will take them to Edmonton and perhaps afterwards to Prince Albert and New Stockholm. This is the fifth party which Mr. Swanson has sent out to the Northwest this summer.

A Montreal despatch says: The exodus to New England has been converted to a New England exodus to Canada. All the seats of the waiting room of the Windsor station were occupied to-day by exiles returning home. They were nearly all French-Canadians from Lowell, Lynn and Manchester and other places in Massachusetts and New Hampshire. The mills are closing, times are hard and they can get no work in the United States. They are coming in thousands. Most of them have saved some money.

A Great Falls, Montana, special says: Considerable surprise was created here yesterday when it became known that Cora Brotherton, the girl who was accidently shot at the Great Falls and Canada depot on the west side, the 8th instant, had died at Lethbridge, Northwest Territory, from the effects of her wound. As the matter now stands it may be no easy matter to convict John Hobbins, who, in a fit of temper, accidentally shot her, as he was arraigned and acquitted, after paying a fine of $100 for attempting an assault with a deadly weapon. This difficulty of convicting in the States is the cause of the numerous lynchings there.

DOMINION REGULATIONS.

Any even numbered sections not being 8 and 26 are open to homestead entry (160 acres) by any person who is the head of a family, or any male over the age of 18 years.

ENTRY.

Entry may be made personally at the local land office for the district in which the land to be taken is situated or if the homesteader desires he may, on application to the Minister of the Interior, Ottawa, or the Commissioner of Dominion Lands, Winnipeg, receive authority for some one to be named by the homesteading settler near the local office to make the entry for him. Entry fee $10, or if cancelled land $20.

DUTIES.

Under the present law homestead duties may be performed in three ways, to be decided on making entry:

1. Three years' cultivation and residence, during which period the settler may not be absent for more than six months in any one year without forfeiting the entry.

2. Residence for three years within two miles of the homestead and actual residence for 3 months in a habitable house next prior to application for patent. Ten acres must be broken the first year after entry, 15 acres additional in the second and 15 in the third year; 10 acres to be in crop the second year, and 25 acres the third year.

3. A settler may reside anywhere for the first two years, in the first year breaking 5 acres, in the second cropping said 5 and breaking additional 10, also building a habitable house. The entry is forfeited if residence is not commenced at the expiration of 2 years from date of entry. The settler must reside upon and cultivate his homestead for at least six months in each year for three years.

APPLICATION FOR PATENT

may be made before the local agent, or any homestead inspector.

Six Months' Notice Must be Given in Writing to the Commissioner of Dominion Lands by a Settler of his Intention Prior to Making Application for Patent.

PRE-EMPTIONS are by law ABOLISHED, and may not be entered for after 1st January, 1889.

A Second Homestead

may be taken by any one who has performed the duties to entitle him to a certificate of recommendation for the first homestead on or prior to the second day of June, 1889.

Forfeited or cancelled Pre-Emptions may be taken as second homesteads.

All communications having reference to lands in dispute and of the Dominion Government, lying between the eastern boundary of Manitoba and the Pacific Coast should be addressed to

H. H. SMITH,
Commissioner of Dominion Lands, Winnipeg.
